What went well for the course? This helps the instructor know what to continue doing. *

The explanations about Docker and Containerizations is good and clear, the additional learning links are ok and helpful.

What didn't go as well? This helps the instructor know what to improve. *

Some instructions are not clear or missing some steps(I am using windows), it is understandable because it is inevitable that there will be bug during installations. The VS code debugger part are a bit problematic because in my experience sometimes it works sometimes it doesn't maybe there is a missing instruction or step

Any general comment you want to leave for the instructor? *

10/10 Mr. Oliver is a good teacher, solid explanation and concise for the most part.
