

1) output: a really is 10

a	10
abc	a

2) output: a is 15
a really is 10

a	10
abc	a

3) Error: a is not defined

4) a is declared but hasn't been set to a specific value yet:

5) final is 25

a	15
---	----

abc(a)	
return	a + 10

abc(a)	a = 15
return	25

6) a is 15

a	15
---	----

7) a is 15
a is 25

a	15
---	----

abc	
a = a + 10	25

console.log("a is", a)
= a is 15
abc(a)

8) a is 15
a is 15

a	15
---	----

abc	
a = a + 10	= 25

= a = 15 + 10

a = 25
console.log("a is", a)

9) a is 15
a is 15

but var a inside
function can't be access

= a is 25
